Employers Within 25 Miles of Sherman, CT: A Marketing Graduate's Field Guide to the Greater Danbury Market

A survey of the employer base inside a 25-mile radius of Sherman, Connecticut — from the two ~2,500-person anchors (Boehringer Ingelheim and Northwell Health's Danbury hospital) and ASML's 3,000-person Wilton site to the Danbury consumer brands, community banks, agencies and nonprofits — with headcounts, geographies, and an honest read on which of them actually hire new marketing graduates in a 5.

Sherman sits on Connecticut's border with New York, and the 25-mile circle around it is unusually well stocked for a town of roughly 3,600 people. Two employers of about 2,500 people each sit inside a 25-minute drive, a semiconductor manufacturer with more than 3,000 employees occupies the far south-western edge of the radius in Wilton, and a snack company founded in Danbury fourteen years ago now employs more than 650 people across the region and is still expanding. The catch is that the market these employers sit in has tightened sharply for people entering it for the first time, and the employers most likely to say yes to a new graduate are not the ones with the biggest payrolls.

What 25 miles of Sherman actually covers

Sherman is a small town in the northern tip of Fairfield County, bordered by New York State to the west and north, New Milford to the east, and New Fairfield and Brookfield to the south. A 25-mile radius from the town centre therefore takes in two states, four counties' worth of commuting patterns, and a labour market with three distinct lobes.

The Connecticut core (roughly 5–15 road miles). New Milford, Brookfield, New Fairfield and Danbury. This is where the density is. Danbury alone contains about **38,033 jobs**, led by health care at **6,803**, retail at **6,324**, government at **5,468** and manufacturing at **4,156**, according to one August 2026 research compilation that cites the underlying federal and state sources[16]. The city has roughly 89,000 residents, has grown in every decade since 1920, and is the seventh-largest municipality in the state[15][16].

The middle ring (roughly 10–20 road miles). Bethel, Ridgefield, Newtown, Redding, and on the New York side Brewster, Carmel and Pawling. Ridgefield matters disproportionately here because a 294-acre pharmaceutical campus straddles the Danbury–Ridgefield town line[3].

The outer ring (roughly 20–30 road miles). Wilton, Southbury, Woodbury, and across the New York line Mahopac, Somers and Katonah. Wilton is about 19 miles from Sherman as the crow flies but closer to 28 by road via Route 7 or through Ridgefield; Waterbury is roughly at the 25-mile boundary by air and beyond it by road. Torrington and Poughkeepsie are outside the radius either way.

Three road corridors do most of the work: **I-84** for Danbury, Bethel, Newtown and Waterbury; **Route 7 and Routes 37/39** for New Milford, Brookfield, Ridgefield and down toward Wilton and Norwalk; and **I-684 plus the NY-22/Route 6 axis** for the Putnam County towns. There is no railway station in Sherman itself. The two rail options in reach are the Danbury Branch of Metro-North, which runs from Danbury south to South Norwalk, and the Harlem Line stations at Southeast and Brewster in New York — both of which mostly point commuters toward White Plains and Manhattan rather than toward local jobs.

KEY FINDING

Distances in this report are approximations from town centres and road geography, not surveyed mileage. The practical filter is drive time: the Danbury core is 15–25 minutes from Sherman, Ridgefield and Wilton are 25–40 minutes, and anything beyond Waterbury is a daily decision rather than a short hop.

The two anchors: pharmaceutical and health care

If you only look at two employers, look at these two. Between them they account for more than **11%** of all employment inside the city of Danbury.

Boehringer Ingelheim is the single most valuable local employer for anyone who wants a marketing career rather than a marketing job. The company's US headquarters and main research hub occupy a **294-acre campus on Ridgebury Road, straddling the Danbury–Ridgefield border**, and the site supports **more than 2,000 employees** — **2,500** in the city's own 2024 count, equal to **5.37% of total city employment** and the **second-largest employer in Danbury** [1] [3]. The Connecticut campus dates to 1977, runs on 100% renewable electricity, and houses administrative offices alongside research laboratories working on cardiovascular, kidney, metabolic, respiratory and oncology programmes, plus veterinary medicine [3]. For a marketer, the significance is not the laboratories; it is that a global pharmaceutical company's US commercial organisation — brand teams, patient marketing, agency management, market access communications — sits a 20-minute drive from Sherman.

Northwell Health – Danbury is the larger of the two at **2,685 employees**, or **5.76% of city employment**, ranking **first** in Danbury [1] [2]. The hospital itself is the 456-bed acute care facility on Hospital Avenue, with a Level II trauma centre and cardiovascular and cancer institutes [2] [16]. In **May 2025** its parent, Nuvance Health, completed a merger with Northwell Health, moving the hospital into a 28-hospital system; Danbury, New Milford, Sharon, Putnam, Northern Dutchess, Norwalk and Vassar Brothers hospitals are all now Northwell sites [10] [16]. Health systems of that size run substantial in-house marketing and communications functions, from service-line campaigns to physician and recruitment marketing, and the integration itself generates years of rebranding and communications work.

	Boehringer Ingelheim	VS	Northwell Health – Danbury

Source: City of Danbury economic development top-10 employer profiles [1] [2] [3].

A second tier of health and life-sciences employers sits just behind them. **MannKind Corporation** is headquartered in Danbury with **621 US-based employees**, and was certified by Great Place to Work in a profile updated in **September 2026**, where **80% of employees** called it a great place to work against 57% at a typical US company [11] [12]. It also ran a **2026 internship programme**, which is the sort of structured entry route that matters to a new graduate [11]. **IQVIA**, the clinical research and commercial data business, is one of Danbury's ten largest employers at an office on Wooster Heights Road [1], and New Milford Hospital remains a significant local site within the Northwell network [5] [10].

> CAUTION
>
> The two anchors are also where competition is stiffest and where marketing openings are least likely to be labelled "entry level." Pharmaceutical brand roles routinely expect two to three years of agency or in-house experience first, and hospital marketing departments hire in small numbers. Treat both as two-year objectives as much as first jobs.

Consumer brands, food and retail

The most interesting local story for a marketer is **LesserEvil**, the better-for-you snack company **founded in Danbury in 2012** and still headquartered there at 41 Eagle Road. In **July 2026** the company signed a long-term lease on a **96,000-square-foot warehouse at 2 Great Pasture Road**, a project expected to create **15 new jobs**, on top of a workforce the company puts at **more than 650 people throughout the region** [8]. CEO Charles Coristine framed the lease as a commitment to the city: "Danbury has been our home for the past 15 years, and signing this long term lease reflects our continued commitment to the city, our team members, and the families who have helped build LesserEvil into what it is today" [8]. Mayor Roberto Alves added that "every job represents a family, a career, and confidence in Danbury's future" [8]. For a marketing graduate, this is a genuine consumer-packaged-goods brand — packaging, retail trade marketing, social, e-commerce — within ten miles of home, and one small enough that a junior hire gets real responsibility.

Kimberly-Clark's Kleenex manufacturing plant in New Milford is the other established consumer business, listed by the state at **500–999 employees** [4]. The New Milford economic development office singles it out as an employer with routes into "Sales, Brand Management and Marketing" as well as manufacturing and supply chain [5]. A plant is not a brand headquarters, so marketing roles there are likely to be site-level or supply-chain-adjacent rather than national campaign work — but it is a Fortune 500 name with a local payroll.

Two more clusters are worth knowing. **Ethan Allen Interiors** keeps its corporate headquarters in Danbury, listed at **100–249 employees** [4], which means brand, catalogue and retail marketing for a national furniture retailer are decided locally. And **Wilton**, at the outer edge of the radius, is where **ASML, Breitling SA, Cannondale and Melissa & Doug** all keep offices [23] — two consumer brands, a luxury watchmaker and a bike company, each with a marketing function, roughly 30–40 minutes away.

The counterweight is **Duracell**. Its former world headquarters in Bethel, a 300,000-square-foot building on 43 acres that once housed **1,000 workers**, was down to **20 researchers** by **March 2026**, as the company completed a relocation to Georgia; Bethel planners were discussing whether to convert the site to at least **200 apartments** and commercial space [7]. The lesson is not that the region is shrinking — the same city hall file contains two expansion announcements — but that a single-tenant corporate campus can empty quickly, and that a marketing career anchored to one building is a fragile thing.

Banking, insurance and professional services

Community finance is a real, if unglamorous, employer base in the Danbury core, and it hires marketers.

Ives Bank, renamed from Savings Bank of Danbury on **4 November 2024** in honour of founding-family descendant Charles Ives, is headquartered in Danbury and operates **16 branches** across Bethel, Brookfield, Danbury, New Fairfield, New Milford, Newtown, Norwalk, Southbury, Stamford and Waterbury [17]. The bank was founded in **1849** and the rebrand was explicitly framed as a growth strategy to appeal to communities beyond Danbury — which is to say, a marketing programme with a budget [17]. **Union Savings Bank**, founded in **1866** by Danbury hat manufacturers and merchants, is the other long-established local institution on Main Street [16]. Both are the kind of employer where a junior marketing coordinator touches branch campaigns, sponsorships, community relations, digital and email — the whole stack, rather than one channel.

Cartus, the global relocation business at 100 Reserve Road, is one of Danbury's ten largest employers [1], and relocation is fundamentally a content, client-marketing and brand-trust business. **Fairfield County Bank** (Ridgefield) and **Newtown Savings Bank** round out the community-bank tier in the middle ring.

Industrial, defence and technology employers

These are the employers most people in the area underrate as marketing destinations, and they are where the regional economy's real capital sits.

ASML Wilton is the largest single employer technically inside the radius. A town briefing in **April 2025** states that Wilton is **ASML's largest site outside its Veldhoven headquarters, with more than 3,000 employees**, and that the company has invested **more than $650 million in the site over five years**; the campus runs to **532,000 square feet**, including 122,000 square feet of cleanroom [14]. The work is advanced optics and mechatronics — reticle stages, wafer clamps, sensors and glass and ceramics structures [14]. The marketing implication is technical: employer branding, trade-show and channel marketing, content for an audience of engineers, and recruitment marketing for scarce skills. It is about 28 road miles from Sherman, which makes it the longest realistic commute in this report.

Elsewhere in the core: **FuelCell Energy** is listed at its Great Pasture Road address in Danbury at **250–499 employees**; **DRS Consolidated Controls** in Danbury also sits at **250–499**; **Entegris** in Danbury and **Branson Ultrasonics** in Brookfield both register at **100–249** [4]. Branson is part of Emerson, which opened a dedicated welding and assembly technologies headquarters in Brookfield's Berkshire Industrial Park in 2021 [20]. **ARKA**, formerly Danbury Mission Technologies, is a defence and space optics business and appears among Danbury's ten largest employers [1].

The clearest signal about the direction of travel is **Imperial Electronic Assembly**, founded in Danbury in 1988, which announced in **July 2026** that it would return its headquarters to the city after 25 years in Brookfield, building a **120,000-square-foot facility** for a **$23 million investment** on top of roughly **125 current workers**, with **40–50 new jobs** expected and another 50 possible as operations expand [9]. Add the smaller New Milford manufacturers — **Neeltran**, a transformer and rectifier maker part of AMSC, and **Vision Engineering**, which builds the Mantis stereo microscope — and Litchfield County has an industrial base with a voice it needs to project: investor relations, product marketing, trade press, recruitment [5].

Media, agencies and creative shops

For a new graduate, this is where the volume of openings actually lives — and where almost nothing is advertised in the way you would expect.

The largest local media employer is **Hearst Connecticut Media Group**, which publishes the **News-Times** from 345 Main Street in Danbury and maintains a news bureau in New Milford that houses a reporter and the staff of *The Greater New Milford Spectrum*, a 20,000-distribution weekly [21]. Hearst's Connecticut group runs ten daily newspapers and roughly 170 journalists statewide, and was advertising audience and content roles in September 2026 — audience development, newsletter and social distribution work that maps closely onto a digital marketing skill set [21].

Townsquare Media's Danbury cluster is the other media-side employer, selling exactly the services a marketing graduate would otherwise be hired to buy. Its two local radio brands reach a stated **32,700** cumulative listeners, its digital properties claim **96,790 monthly unique visitors** and **40,351** social followers, and the product set spans radio, targeted display, geo-fenced mobile, video, SEO, website design and social content [22]. Media sales and campaign management is a legitimate first job for someone with a marketing degree and a high tolerance for quotas.

On the agency side, Expertise.com's curated list of Danbury-serving digital agencies names firms that are small, local and hiring in ones and twos rather than cohorts: **Aspire Digital Solutions** at 38C Grove Street in Ridgefield; **MarkNet Group** at 83 Wooster Heights in Danbury; **Mack Media Group** at 604 Federal Road in Brookfield; **iDayDream Studios** at 7 National Place in Danbury, which does audio, photography, video and copy in addition to paid and social work [13]. Most of these shops have a founder with 5–30 years of combined team experience and a client roster of local businesses [13]. The

pay is lower and the training is unstructured, but two years in a three-person agency produces a portfolio and a range of channels that a large-company marketing assistant role will not.

KEY FINDING

The agency market around Danbury is a portfolio market, not a posting market. Send work, not applications. A short deck of spec campaigns for two local businesses will outperform a résumé at every shop on this list.

Nonprofits, education and the public sector

The institutional sector is smaller in profile but steadier, and it hires people who can write.

Ability Beyond, the disability services organisation based on Berkshire Boulevard in Bethel, is listed at **500–999 employees** [4], which makes it one of the largest employers in the entire Danbury area — and nonprofits of that size run development, donor communications, events and recruitment marketing in-house.

Western Connecticut State University, the **City of Danbury**, and the **Danbury Public Schools** are all among the city's ten largest employers [1]. Universities and school districts hire admissions marketing, alumni communications and web content staff, and they offer state or public-sector benefits with genuine job security. **Canterbury School** in New Milford, a boarding and day school founded in 1915, is listed at **100–249 employees** [4] [5]; independent schools of that kind routinely employ a marketing and admissions communications function, and there are several within the radius.

Across the New York line: Putnam County

Sherman's closest neighbours to the west and north are in New York, and the labour market there is smaller, more institutional and considerably less contested by Danbury job-seekers.

Green Chimneys, the nature-based, animal-focused multi-service agency based in Brewster, states plainly that it is **the third-largest employer in Putnam County**, with programmes spanning special education, residential childcare, clinical services, farm and wildlife, outdoor education and community outreach [24]. **Putnam Hospital** in Carmel, now part of Northwell following the Nuvance transaction, is the county's largest healthcare site [10]. County government in Carmel also hires.

The macro picture is mildly positive: New York's Department of Labor reported that **Putnam County's private-sector job count grew 1.3% year over year in August 2026**, within a Hudson Valley region that added 14,000 private jobs (up 1.7%) to a record 859,900, with private education and health services the leading generator at 239,800 jobs [25]. Putnam lags the region, but it is growing, and the drive from Sherman to Brewster or Carmel is short.

The market you are walking into

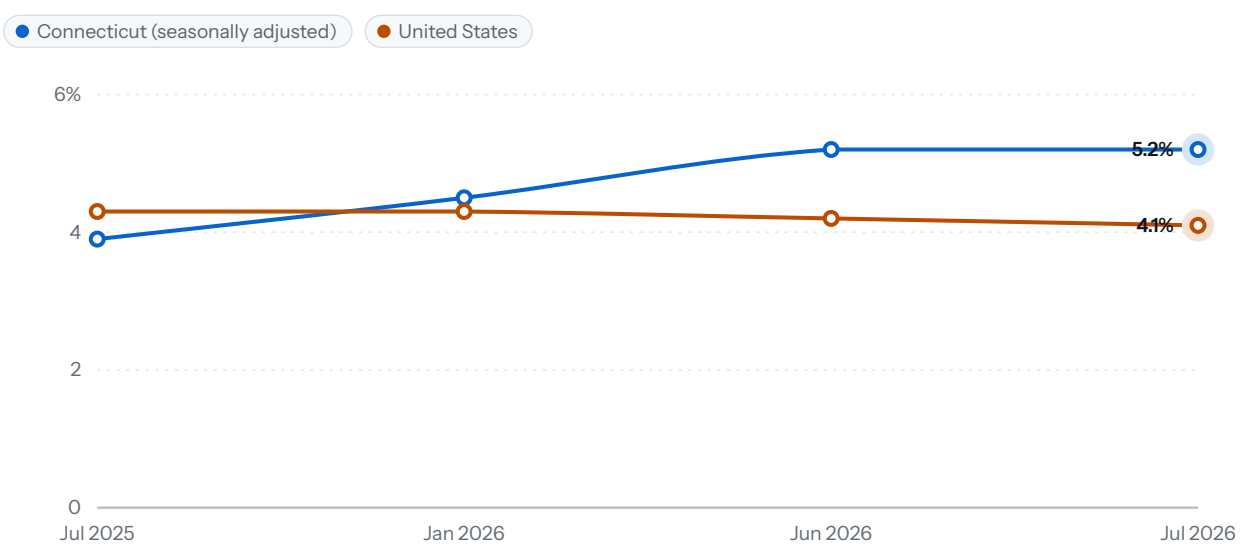
This is the part that should shape how you apply, not whether you do.

New Milford's unemployment rate stood at **5.3% in July 2026** on an estimated labour force of **15,524 residents**, with 14,695 employed and 829 unemployed — a figure that is not seasonally adjusted[6]. Connecticut's statewide rate was **5.2%**, and it has now been **above the national rate for seven consecutive months**: **5.2% against 4.1%** in July, up from **3.9% in July 2025**[6]. The gap has widened all year, from two-tenths of a point in January, when the state stood at 4.5% and the nation at 4.3%[6].

And yet the state's payrolls hit an **all-time high of 1,730,500** in July, with employers adding 2,800 jobs that month and 13,800 over the year, and private-sector employment up 1.0%[6]. The explanation comes from the state labor department's research director, Patrick Flaherty:

> *"Job growth has outpaced the nation so far in 2026, with health care and social assistance and manufacturing adding the most jobs this year to date. The unemployment rate is higher than it was a year ago, but layoffs are not. New entrants into the labor force are taking longer to find work than they did a year ago even as payroll jobs are increasing."*[6]

That is precisely the condition a 2026 marketing graduate is navigating: not a city where jobs are disappearing, but a market where the first job takes longer to land.



Source: Connecticut Department of Labor, reported 20 August 2026[6].

The local investment signals cut the other way, which is why this is not a doom scenario. Within a single eighteen-month window, Danbury gained a 96,000-square-foot LesserEvil warehouse and 15 jobs[8], watched Imperial Electronic Assembly commit $23 million and 40–50 jobs to a return move[9], and saw its hospital absorbed into a 28-hospital system that will spend years rebranding[10][16]. Capital is being committed on the ground even as the headline unemployment rate rises.

  Connecticut sits at 5.2% against a national 4.1%, the seventh straight month above the US rate

Where the entry-level marketing openings actually are

Mapping the employer base onto roles a new graduate can realistically win produces a clearer picture than any ranked list of companies.

Most likely as a first job: agency account coordinator, digital/SEO specialist or content producer at a 3–20 person shop in Danbury, Brookfield or Ridgefield[13]; marketing coordinator or member-relations and community marketing roles at Ives Bank or Union Savings Bank[16][17]; audience or content roles in local media[21]; marketing and admissions support at an independent school or university[1][4]; development and communications assistant roles at Ability Beyond or a similar nonprofit[4]. These roles pay least and train fastest. They also rarely appear on job boards.

Plausible with a strong internship record: brand or trade-marketing assistant at LesserEvil[8]; marketing roles at Kimberly-Clark's New Milford operation[4][5]; campaign or media sales roles at Townsquare Media's Danbury cluster[22]; recruitment and employer-brand marketing at ASML Wilton or the region's industrial employers[4][14].

Realistic two-year targets rather than first jobs: pharmaceutical brand, commercial or patient marketing at Boehringer Ingelheim [3]; system marketing, digital and communications roles at Northwell's Danbury and New Milford sites [2] [10]; data-driven commercial roles at IQVIA [1]; brand and product marketing at MannKind [11]. The conventional route into these is a first job somewhere smaller, then a move — or, in the pharmaceutical case, an agency-side or contract role followed by a permanent hire.

The state's size-band list for the Danbury area

The Connecticut Department of Labor registers employers by size band rather than exact headcount. The bands below come from its employer search for the Danbury area, last updated July 2026 [4].

EMPLOYER	TOWN	BAND
Kimberly-Clark (Kleenex)	New Milford	500–999
Ability Beyond	Bethel	500–999
Costco, Home Depot, FuelCell Energy, DRS Consolidated Controls, Cascades Assisted Living, Danbury High School	Brookfield / Danbury / Bethel	250–499
Ethan Allen Interiors, Entegris, Eaton, Branson Ultrasonics, Imperial Electronic Assembly, Big Y, Caraluzzi's, Canterbury School	Danbury / Bethel / Brookfield / New Milford	100–249

The city of Danbury, by contrast, publishes exact 2024 figures: Northwell Health–Danbury **2,685**, Boehringer Ingelheim **2,500**, and eight further employers in its top ten [1] [2] [3].

Known headcounts of the largest employers near Sherman

ASML is a stated floor ('more than 3,000'); LesserEvil's figure is regional, not Danbury-only. Sources: Wilton CT/ASML [14]; Danbury EDC [1] [2] [3]; LesserEvil [8]; Great Place to Work [11].

How to work this market

The single most underused asset here is the institution you already belong to. UConn's **Center for Career Readiness and Life Skills** runs **Handshake**, which the university describes as its platform for

job listings, internship applications and interview scheduling, open to students and recent graduates[18]. The centre also publishes **first-destination undergraduate outcomes** — employment or further study within six months of graduation, filterable by school and by major, including Marketing, Marketing Management and Digital Marketing & Analytics[19]. That data is the fastest way to find out where UConn marketing graduates in your cohort actually went, and which employers have a track record of taking them.

Then the local networks, which matter more than they look. The **Greater Danbury Chamber of Commerce** runs a member directory and events calendar, and its **Leadership Greater Danbury** programme is a well-known route to visibility with exactly the employers on this list; the chamber describes Danbury as a city that has preserved New England traditions while accommodating "residential and Fortune 500 corporate growth"[15].

Four practical asymmetries to plan around:

- **Large employers do not post where you are looking.** Boehringer Ingelheim, Northwell, ASML, MannKind, Ethan Allen, Ives Bank and FuelCell Energy all recruit through their own career portals. Set standing alerts on each company's site rather than relying on aggregators[1][3][11][14][17].
- **Agencies and small brands hire from referrals and portfolios**[13]. Every shop named above is small enough that one well-researched email to the founder is read.
- **Nonprofits and schools advertise widely but late**, often in spring for a summer or autumn start, and they value writing samples over analytics credentials.
- **Distance is a drive-time problem, not a radius problem.** Fifteen miles to Danbury is a coffee; 28 miles to Wilton on Route 7 in commuting hours is not. If you apply to ASML or the Wilton consumer brands, test the drive before you test the interview[14][23].

The shortlist, ranked

The table below orders employers by how well they fit a 2026 marketing graduate, not by size. The top five are the ones worth real effort; the rest are the realistic volume of this market.

RANK	EMPLOYER	WHERE	SIZE	FROM SHERMAN	WHY IT MAKES THE LIST
1	**Boehringer Ingelheim**	Ridgefield / Danbury line	2,500 (2024)	~10 mi	US HQ and commercial organisation; the deepest marketing bench within the radius[3]
2	**Northwell Health – Danbury**	Danbury	2,685 (2024)	~10 mi	Region's #1 employer; years of integration and service-line marketing work[1][2][10]
3	**LesserEvil**	Danbury (41 Eagle Rd)	650+ regionally	~10 mi	Home-grown CPG brand still adding space and jobs; junior hires get real scope[8]

RANK	EMPLOYER	WHERE	SIZE	FROM SHERMAN	WHY IT MAKES THE LIST
4	**ASML Wilton**	Wilton	3,000+	~28 mi	Largest site in the radius; technical, employer-brand and channel marketing [14]
5	**MannKind**	Danbury	621 (US)	~10 mi	Great Place to Work certified at 80%; runs a 2026 internship programme [11] [12]
6	**IQVIA**	Danbury (Wooster Hts)	Top-10 city employer	~10 mi	Healthcare data and commercial services; analyst-adjacent marketing roles [1]
7	**Cartus**	Danbury (100 Reserve Rd)	Top-10 city employer	~10 mi	Relocation services — content, brand and client marketing in-house [1]
8	**Kimberly-Clark**	New Milford	500–999	~10 mi	Fortune 500 consumer name with brand-management career paths [4] [5]
9	**Ethan Allen Interiors**	Danbury	100–249	~10 mi	National retailer running brand and catalogue marketing from Danbury [4]
10	**Ives Bank / Union Savings Bank**	Danbury	Community banks, 16 branches +	~10 mi	Junior marketers touch the full channel mix; rebrand-driven work [16] [17]
11	**Hearst CT Media (News-Times)**	Danbury	10 dailies statewide	~10 mi	Audience, newsletter and social distribution roles [21]
12	**Ability Beyond**	Bethel	500–999	~15 mi	Large nonprofit with in-house development and communications [4]
13	**ARKA (Danbury Mission Technologies)**	Danbury	Top-10 city employer	~10 mi	Defence and space optics; recruitment and technical marketing [1]
14	**FuelCell Energy / Entegris / DRS**	Danbury	100–499 each	~10 mi	Clean energy and electronics; investor, trade and product marketing [4]
15	**Townsquare Media Danbury**	Danbury	Regional cluster	~10 mi	Media sales and campaign management; a quota-based entry route [22]
16	**Danbury-area agency field**	Danbury / Ridgefield / Brookfield	3–20 each	10–20 mi	Fastest route to a portfolio and multi-channel range [13]
17	**Green Chimneys / Putnam Hospital**	Brewster / Carmel, NY	County top three	~10–13 mi	The NY-side market, with far less competition from Danbury applicants [10] [24]

Bottom line

Three tiers, three different strategies. The **career anchors** — Boehringer Ingelheim and Northwell Health's Danbury hospital, 2,500 and 2,685 employees respectively and together more than 11% of the city's employment — are where a marketing career in this region can actually be built, but they are mostly two-year targets and should be researched now, applied to later[1][2][3]. The **growth bets** — LesserEvil, ASML Wilton, MannKind, and the returning manufacturer Imperial Electronic Assembly — are companies expanding on a site within 30 miles, where a junior marketing hire is close enough to the decision-makers to matter[8][9][11][14]. The **volume route** — community banks, independent schools, nonprofits, the News-Times, and the field of three-to-twenty-person agencies around Danbury, Ridgefield and Brookfield — is where the openings that say "assistant" or "coordinator" actually are, and where a portfolio gets built[13][16][17][21].

Set against that, the market has turned: New Milford at 5.3% unemployment in July 2026, Connecticut at 5.2% and above the national rate for seven straight months, with new entrants to the labour force taking longer to find work even as payrolls hit record highs[6]. The local economy is still adding capital and jobs; it is simply no longer handing them out quickly. Apply broadly, favour the Danbury core where the drive is short, and treat the agency route as a destination rather than a consolation prize.
